

Welcome to the improved Public Online Portal of the Lands Commission.

As part of our commitment to delivering exceptional service, we have introduced several key changes to the portal that prioritize convenience, security, and user support.

Phone Number-Based Verification

In response to feedback and to improve user convenience, the upgraded portal now uses **phone numbers** as the primary mode of verification instead of email when creating an account.

By shifting to this method, we ensure quicker and more reliable authentication processes. Phone numbers offer a direct and consistent way of verifying users, reducing delays often associated with email-based verifications and ensuring accessibility for users on the go.

Check List

NB: Please confirm all items in the checklist below. You need to have all these for service be completed successfully.

DESCRIPTION	OPTION
The Parcel on the scanned site plan must be edged pink/red	☐
The scanned site plan must be drawn to a standard scale	☐
The grid on the scanned site plan must be visible	☐

Applicant's Name * Applicant's Gender *

Yaw Ansah Male

Applicant's Address * Applicant's Phone Number *

Nigeria, Lagos 0233435678

Land Size(Acres) * Type of Use*

0.23 INDUSTRIAL

Office Region * Locality *

Greater Accra - Accra Office ABBEYMAN ASUJABA

Enhanced Account Functionality

Users can now manage multiple applications for different individuals using a single account.

This change eliminates the previous requirement of creating separate accounts for each application, making the portal more flexible and user-friendly for those handling transactions for family members, businesses, or other parties.

Strengthened Security Measures

Security is a top priority in the improved portal. We have introduced an **OTP (One-Time Password)** verification system, which requires users to verify their identity through a unique code sent to their registered phone number before accessing their account.

This added layer of security ensures that only authorized individuals can log in to their accounts and protects user data from unauthorized access. The OTP system is quick, reliable, and designed to safeguard your interactions on the portal.

Comprehensive Support and Enquiry System

A robust Support and Enquiry System has been integrated into the portal to ensure that users have access to the help they need at every stage. This system allows users to submit enquiries, monitor the status of their concerns, and receive prompt resolutions from our dedicated support team. Whether you have questions about the portal's features, need technical assistance, or seek updates on your transactions, the support system is equipped to provide timely and effective assistance.

What You Can Expect

The upgraded Public Online Portal reflects the Lands Commission's ongoing efforts to simplify land administration processes and enhance the user experience through digital innovation. With the changes, you can expect a platform that is more secure, flexible, and responsive to your needs.

We appreciate your cooperation during this transition period and your trust in the Lands Commission as your partner in land administration. Thank you for choosing the Public Online Portal. Let us work together to build a more accessible and efficient future.
